POST-DIAGNOSIS FINANCIAL CARE · SEOUL

🏆 Grand Prize · FIN:NECT Challenge 2026

Meet us at **TechCrunch Disrupt 2026**

One diagnosis certificate. Every benefit that follows.

1 THE PROBLEM

Korean critical-illness families lose benefits they already qualify for.
No one tells them what to claim, and deadlines pass during treatment.

WHERE **South Korea** WHO **Critical-illness patients** **Family caregivers**

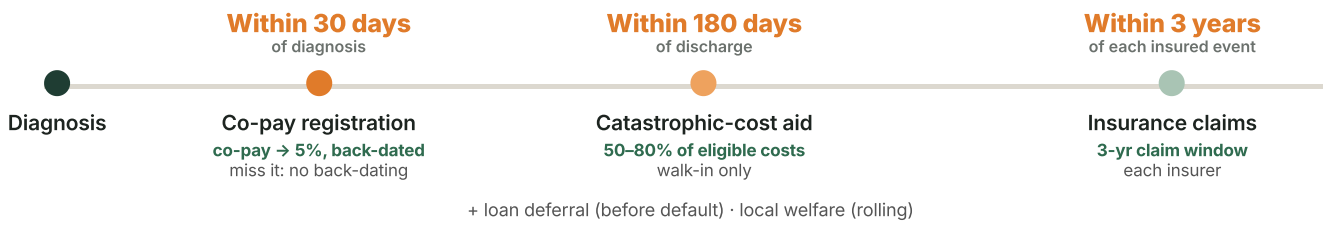

KOREA CONTEXT Universal public insurance (NHIS) covers everyone · ~80% also hold private supplementary policies · benefits must be **claimed**, not auto-paid

$7.6B
unclaimed insurance benefits in Korea
₩10.3T · Financial Services Commission, 2025

28.4%
of Korean critical-illness households face catastrophic medical costs · **2× others**
National Health Insurance Service data, 2023

15,476
medical-cost personal bankruptcies in Korea, last 5 years
National Court Administration, 2026

KOREA'S POST-DIAGNOSIS PROGRAMS: 6+ CHANNELS · 6+ DEADLINES

+ loan deferral (before default) · local welfare (rolling)

> Families don't need more information.
> **They need every application managed to the finish.**

2 WHY IT'S STILL UNSOLVED

Everyone owns one piece. No one owns the journey.

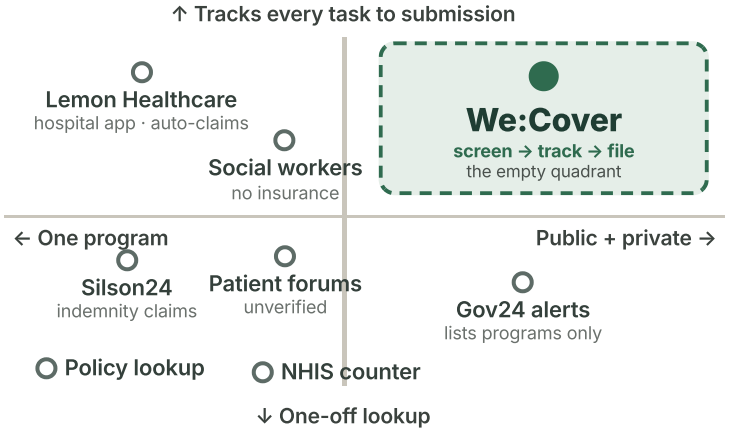

GOV'T AGENCIES · NHIS
Siloed 1 program · 1 form · 1 deadline each

KOREAN HOSPITALS
Overloaded 60–90 cases / social worker / month (6–7 recommended)

PRIVATE INSURERS
Reactive Pay what's filed, not what's owed

GENERAL-PURPOSE AI — Can't ask what you don't know · No personal context · Wrong answers cost money

EXISTING TOOLS IN KOREA: ONE PROGRAM, OR ONE LOOKUP

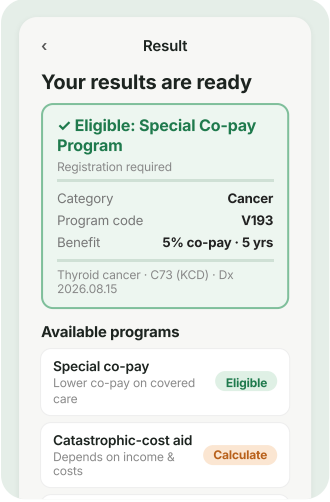

All figures: South Korea · $1 ≈ ₩1,360

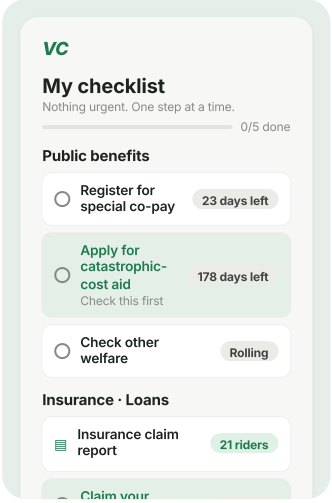

The empty quadrant: **public + private benefits, tracked to submission.** That's We:Cover.

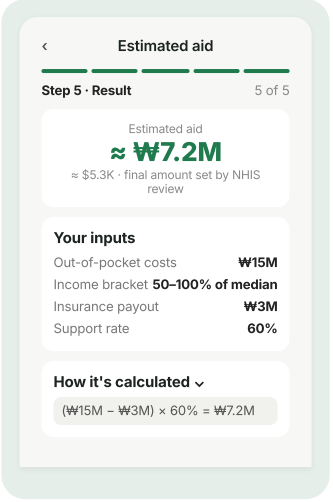

How we solve it → **overleaf**

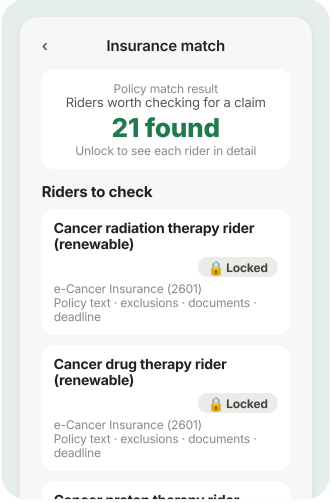

We:Cover One certificate in. A managed claim plan out.

3 OUR SOLUTION

01
Screen
Snap certificate (OCR) or enter code
→ eligible programs flagged

02
Track
Every task gets a deadline
→ 23 & 178 days left · 0/5 done

03
Complete
NHIS formula + form guide
→ est. aid ≈ $5.3K (₩7.2M)

04
Recover
Diagnosis code × your policies
→ 21 riders, clause cited

App screens shown in English for reference · live app is in Korean

Proactive
Shows benefits before you ask

Personal
Your diagnosis · income · policies

Verified
Rule DB + policy text, no LLM guesswork

4 VALIDATED

5/7
core features live on real data

1,419
disease codes

680
insurer coverage items

🏆 **Grand Prize**
FIN:NECT Challenge 2026

9 / 10 test users: "useful"
4 field partners: NHIS · Korea Univ. Guro Hosp. · SNU Bundang Hosp. · Hanwha Life

5 BUSINESS MODEL & GROWTH

FREE TO DISCOVER · PAID TO CLAIM

FREE **Scan** → PAID **Claim report** → PHASE 2 **Adjuster**

Korea market · 3.16M critical-illness patients/yr · $1 ≈ ₩1,360

TAM	SAM	SOM · YR 3
$210M	$92M	$1.1M

Yr 3 target: **$1.1M revenue · 17,191 paying users**

GO-TO-MARKET

Korean hospital MOUs
QR at admissions desks · $0 for hospitals

Korean patient communities
5 major groups · ~1.04M members

ROADMAP

1.0 · Now
Subsidies + insurance claims

2.0
All medical aid · welfare · loan deferral

3.0
Whole recovery journey
